

COLLEGE INFORMATION

Revised 9/07

GENERAL INFORMATION

A. WHAT'S THE CEEB CODE?

The College Entrance Board (CEEB) code for LHS is **051418**. Please remember to use this number on your applications for college admissions test.

B. WHAT'S AN UNDERGRADUATE?

1. Undergraduate-a student of a university or college who has not yet completed a Bachelor's Degree.
2. Undergraduate Major- the subject in which one specializes in order to obtain a Bachelor's Degree.
3. Impacted/oversubscribed programs- The University of California and California State Universities designate programs and campuses to be impacted when more applications are received in the initial filing period than the space available. You must meet supplementary admissions criteria if applying to an impacted program or campus. All UC campuses except Riverside are impacted and San Luis Obispo is an impacted CSU campus. Students must exceed the minimum academic eligibility index in order to be competitive applicants to these campuses. It is important for all students to take as challenging and academic program as possible each semester and to perform at their highest level in order to increase their chances of gaining admission to the college of their choice.

C. PRE-LAW AND PRE-MED

It is not possible to major in medicine or law as an undergraduate.

1. Students who plan to become attorneys should choose majors in college that facilitate reading, writing, thinking, reasoning, and analysis. Consider a major that you enjoy and can do well in (GPA is important in applying for law school). The major selected should be one that you could use in coordination with the law degree after graduation. Admission to law school is based upon the score on the last LSAT, college GPA, letters of recommendation, volunteer and extra-curricular activities (especially in the legal area) and the student's personal qualities.
2. Students who plan to become medical doctors should choose majors they enjoy and do well in. Many students choose majors, which facilitate the understanding or scientific concepts and overlap the core classes that are required for admission to medical schools. Students may choose to major in the humanities or social sciences as long as they take the core classes. core classes are Inorganic Chemistry, Organic Chemistry, Biological and/or Zoological Sciences, Calculus, Physics and English. Admission to Medical School is based upon the score on the MCAT, college GPA, and volunteer and extra-curricular activities (especially in the health field) and the student's personal qualities.

D. TRANSCRIPTS

The Antelope Valley Union High School District uses an outside service called **Docufide** for electronically submitting official transcripts to colleges and universities upon graduation. For information on submitting your transcripts, go to www.docufide.com or see the LHS registrar.
