

To help protect students and schools, all students in high school need proof of a booster shot against whooping cough in order to continue attending classes this year.

If your student hasn't had a Tdap booster shot yet, please schedule an appointment immediately. See the list of area clinics below.

If your student has already received the Tdap booster shot, please make sure we have a copy of the shot record as soon as possible.

For questions, please call the
LHS Health Office at 944-5209, extension 365.

Thank you for keeping our school and community healthy!
